

PET CARE APPLICATION

- BY:
- Nanthitha M-22CSRI27
- Pavithra R S-22CSRI44
- Sampritha A-22CSRI69

Spring Boot:

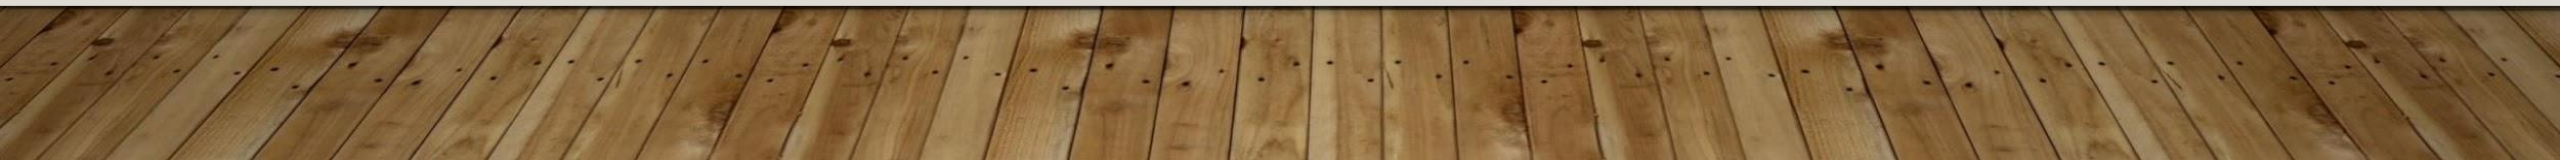

- Spring Boot is a Java-based framework that simplifies the development of production-grade Spring applications. It offers auto-configuration, standalone deployment, opinionated defaults, integration with the Spring ecosystem, production-ready features, and dependency management through starters.

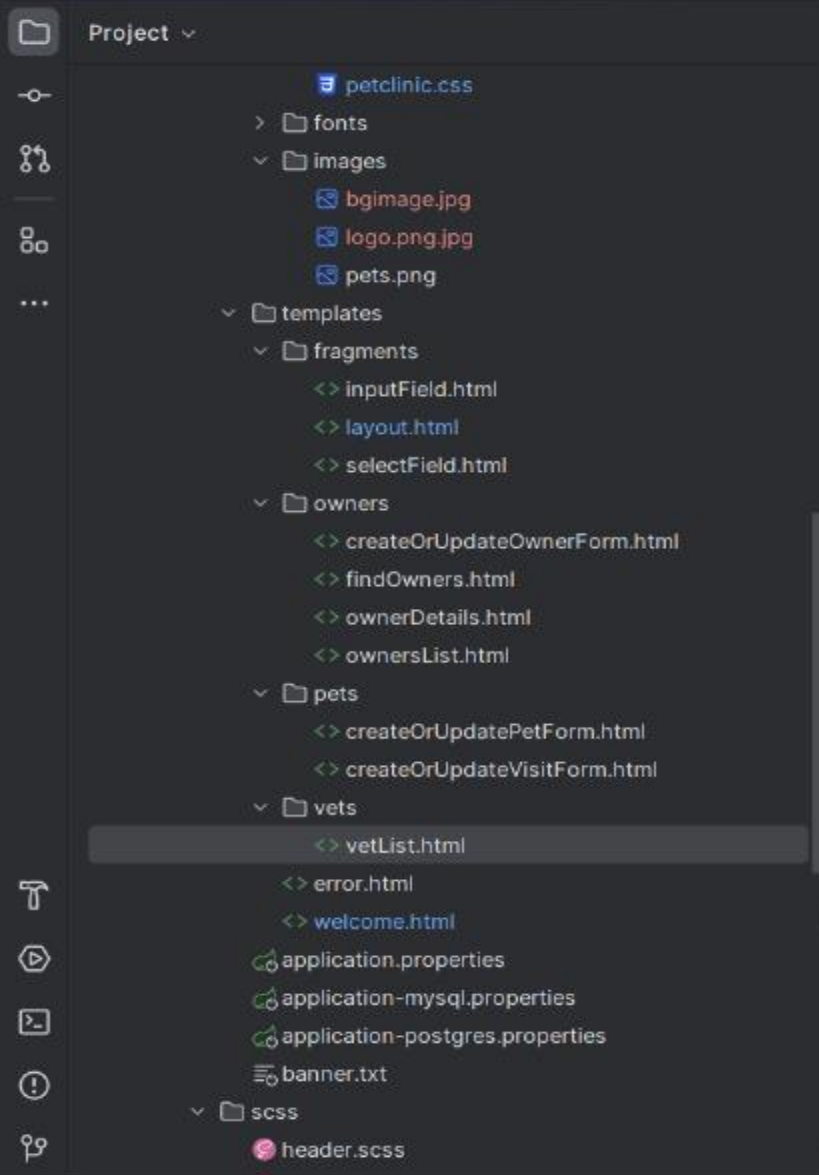

Project Overview:

- ✓ The proposed system, the administrator can insert, delete and modify the owner of the patient records as per the requirements.
- ✓ The objective is to create an interface in which pet owners can contact veterinary doctors for immediate consultation for their pet

Software Used:

1. Java – backend
2. MySQL – database
3. HTML - frontend

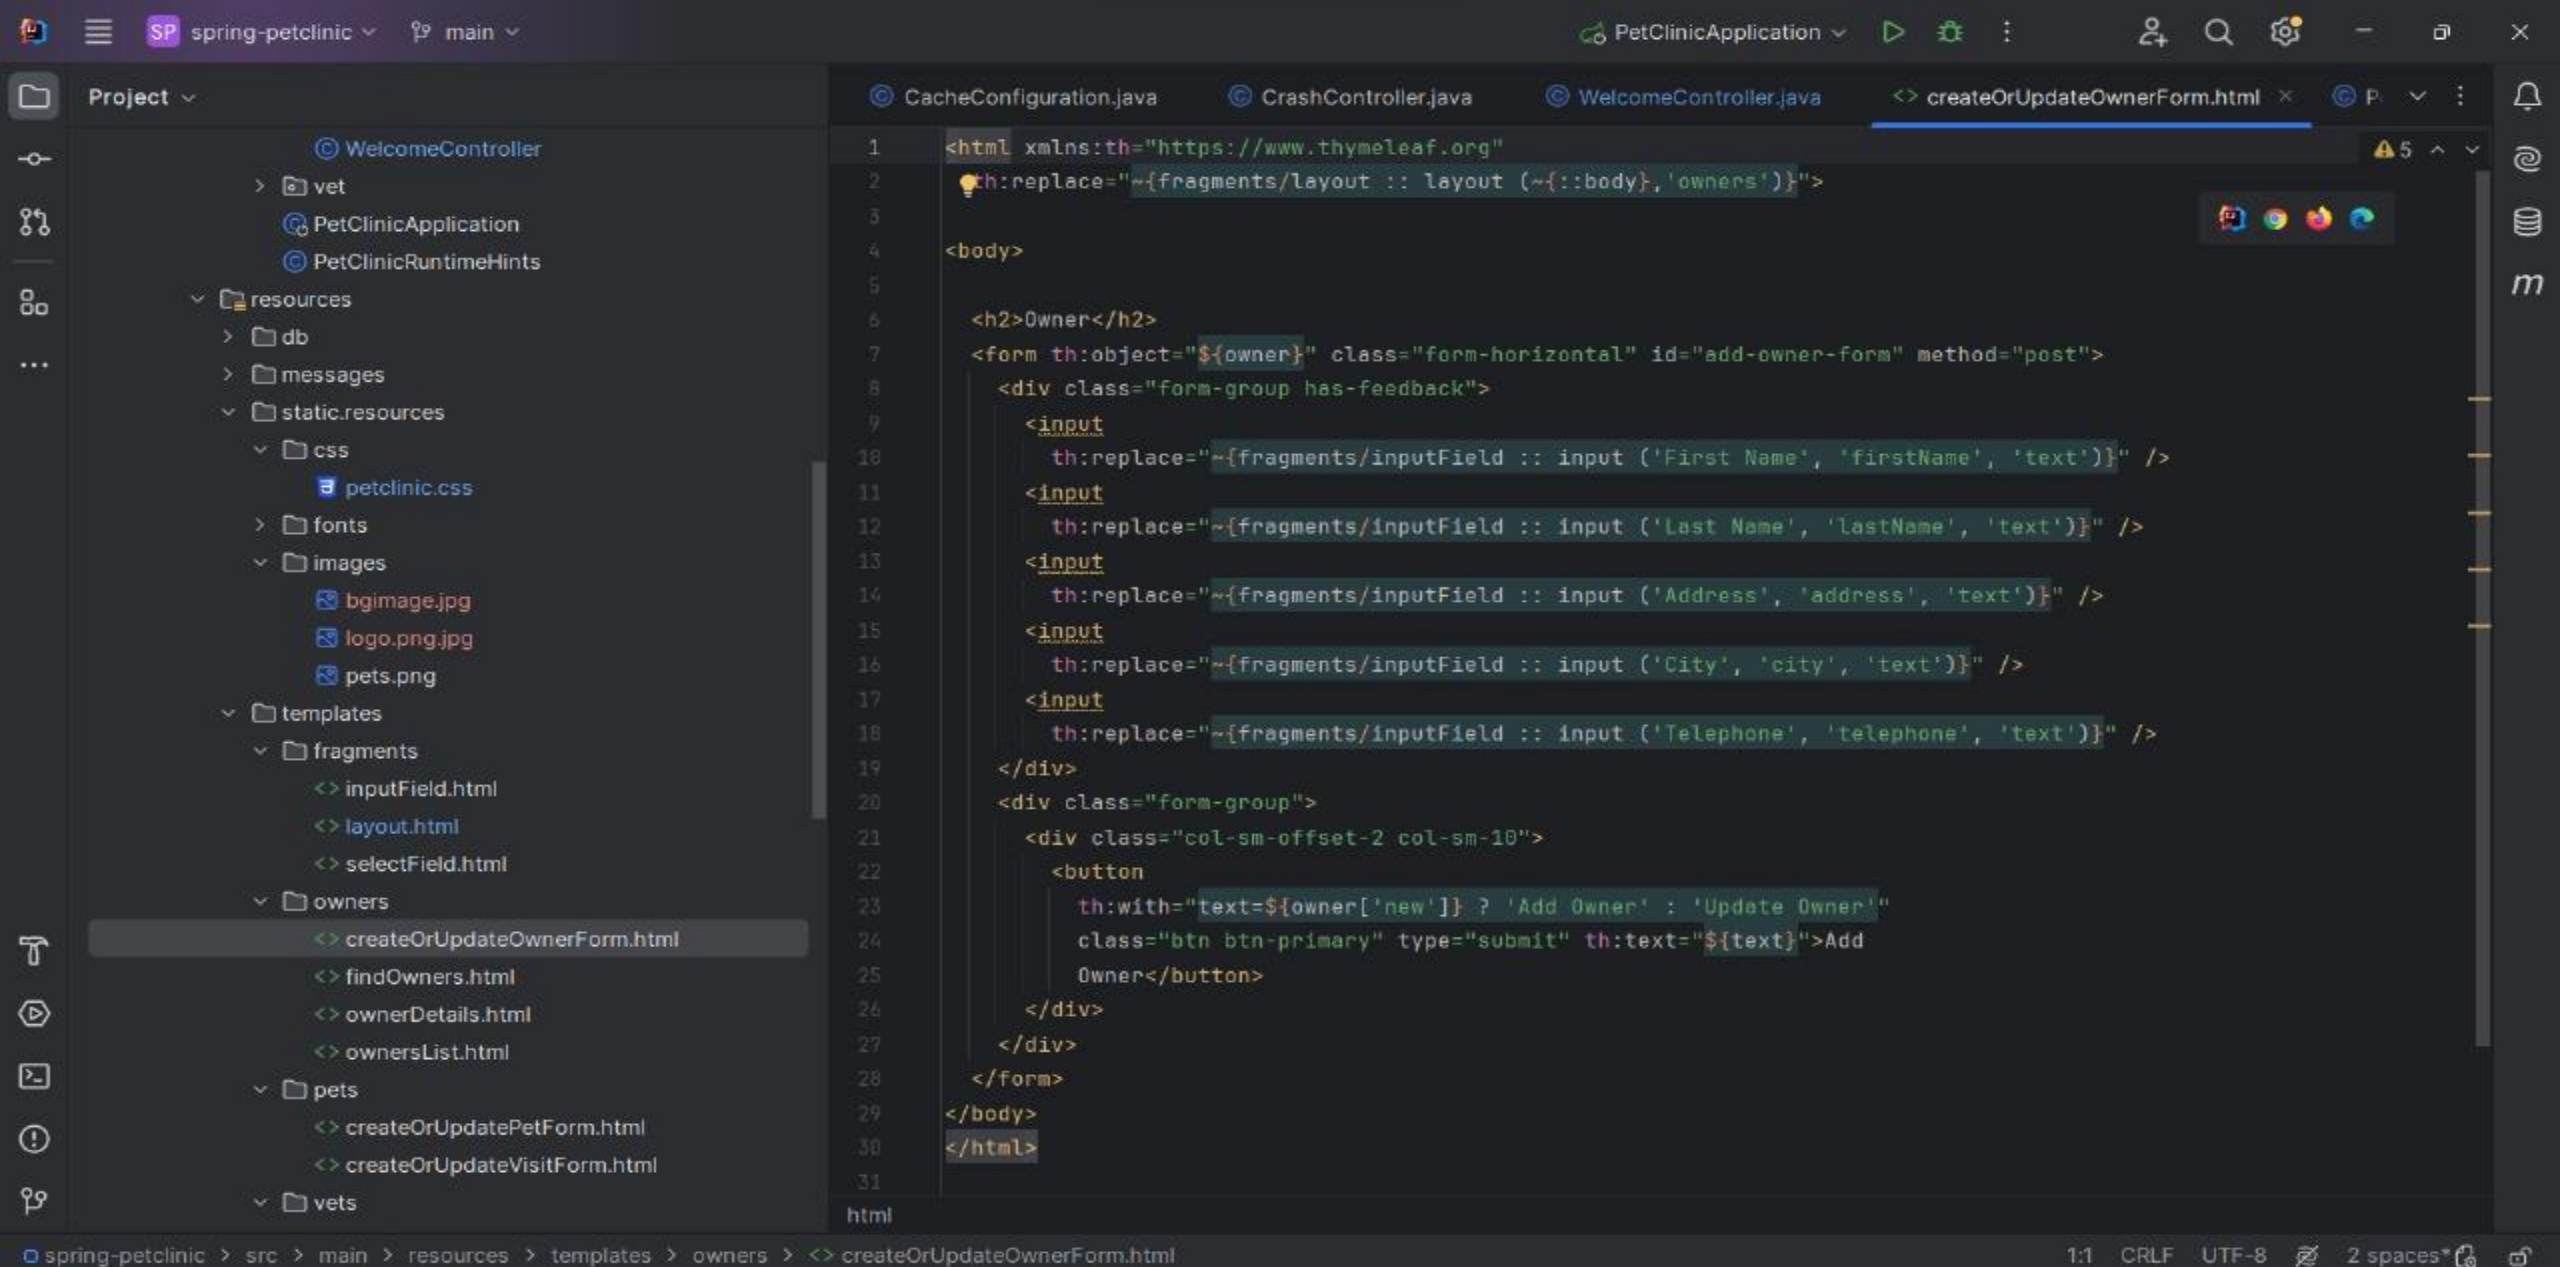

```
Controller.java WelcomeController.java createOrUpdateOwnerForm.html ownerDetails.html vetList.html
25 </table>
26
27 <div th:if="${totalPages > 1}">
28   <span>Pages:</span>
29   <span></span>
30   <span th:each="i: ${#numbers.sequence(1, totalPages)}">
31     <a th:if="${currentPage != 1}" th:href="@{/vets.html?page=__${i}__}">[[${i}]]</a>
32     <span th:unless="${currentPage != 1}">[[${i}]]</span>
33   </span>
34   <span></span>
35   <span>
36     <a th:if="${currentPage > 1}" th:href="@{/vets.html?page=1}" title="First"
37       class="fa fa-fast-backward"></a>
38     <span th:unless="${currentPage > 1}" title="First" class="fa fa-fast-backward"></span>
39   </span>
